

XM Satalite Radio has goy to be the best source of weather and traffic around. I choose to pay XM for their services, and encourage millions more to do so. Why listen to FM/AM radio for news, traffic, weather, etc., when all you hear are commercials and advertisements? If that is what the people of America really wanted, then satalite radio would not be so successful. Not to mention, who wants to listen to an AM weather channel when you can barely understand what is being said. The clarity, quality, and accuracy of information is whats gonna keep me an XM subscriber for life. I strongly encourage you to reject the NAB's petition 04-160.
